ABOUT ME

Versatile Full-Stack Web Developer proficient in PHP, Laravel MVC, JavaScript, and custom WordPress theme/plugin development. Experienced in end-to-end web application development—from database schema design and REST API consumption to frontend UI implementation. Focused on writing efficient code, automating workflows, and building robust web applications.

EDUCATION AND TRAINING

BSc Computer science

The University of Agriculture [01/09/2016 – 11/12/2026]

City: Peshawar | **Country:** Pakistan

WORK EXPERIENCE

Farid and sons Travel – Remote, Pakistan

Full Stack Web Developer

[01/12/2025 – Current]

- **Full-Stack Platform Development:** Engineered and maintained end-to-end B2B and B2C flight booking applications using Laravel (MVC), PHP, MySQL, JavaScript, HTML, and CSS.
- **Complex NDC API Integration:** Integrated NDC API v2 RESTful endpoints to manage flight searches, dynamic fare pricing, passenger profiles, ancillary selection (seats, baggage, meals, bundles), and ticketing.
- **Dynamic Business Logic & Flags:** Built conditional frontend/backend logic driven by API response flags to handle mandatory vs. optional ancillaries, fare rules, and dynamic hold eligibility (canBeHeld).
- **Flexible Booking & Payment Systems:** Implemented "Book & Pay Now" and "Hold & Pay Later" checkout flows, including fare revalidation, PNR generation, and post-hold booking completion.
- **B2B Agent Portal & Wallet Engine:** Built agency management tools, including wallet/credit limit balances, automated markup/discount rules, and agent booking permissions.
- **Database & Schema Architecture:** Designed and optimized MySQL relational database schemas for users, agents, multi-passenger bookings, PNR references, and transaction histories using Eloquent ORM and migrations.
- **Queue & Asynchronous Processing:** Implemented Laravel Queues and background Jobs to handle asynchronous tasks such as sending booking confirmation emails, generating PDF e-tickets.
- **Testing, UAT & Debugging:** Conducted end-to-end API testing and payload debugging using Postman and logs in UAT environments to resolve edge cases prior to deployment.

Psx Ascend – Remote, United States

WordPress developer

[01/08/2024 – Current]

- Developing WordPress websites for multiple dealers using **Elementor Pro** and **Gravity Forms**, with custom PHP/API integrations for CRM and inventory.
- Integrated dealer CRM inventory data into WordPress via REST/JSON APIs and displayed it through custom Elementor widgets and dynamic content areas.
- Used **ACF + Elementor Dynamic Content** to map CRM/inventory fields (price, specs, status, location, images) to front-end listings and detail pages.
- Optimized inventory listing pages (filters, search, sorting) using custom queries and AJAX, integrated with Elementor templates for a smooth UX.
- Implemented lead capture forms (enquiry, test drive, finance, trade-in) using **Gravity Forms**, with conditional logic, multi-step forms, and file uploads where required.
- Configured **Gravity Forms integrations / custom hooks** to push form submissions directly into the CRM with dealer-specific tagging, source tracking, and user metadata.
- Added logic to map website leads to the correct dealer based on domain, location, or selected branch, ensuring accurate CRM routing.
- Collaborated with backend/CRM developers to define API contracts, field mappings, and lead data requirements for smooth integration.
- Documented integration flows (API endpoints, field mappings, cron schedules, error codes) and Elementor/Gravity Forms configurations to support future maintenance and onboarding.

🏢 ***Sigma Digital Solution*** – Islamabad, Pakistan

Wordpress / PHP Developer

[19/06/2023 – 31/07/2024]

- Took multiple client websites from concept/Figma through to live WordPress builds, handling theme development, ACF modeling, and content migration.
- Developed custom WordPress themes following WordPress coding standards, with reusable template parts and modular PHP code.
- Built custom plugins to add client-specific features (forms, integrations, business logic) while keeping core upgrade-safe.
- Converted Figma designs into custom WordPress themes using PHP, HTML5, CSS3, Bootstrap5, JavaScript and Jquery with pixel-perfect accuracy.
- Designed scalable content models (custom post types, taxonomies, ACF field groups) that non-technical teams can manage long-term.
- Implemented lead-generation focused features: enquiry forms, brochure downloads, booking/ availability info, and clear CTAs across all sites.
- Delivered responsive, performance-optimized WordPress sites for diverse sectors: luxury interiors, hospitality consulting, holiday rentals, and F&B.
- Collaborated with designers and project managers to turn business requirements into technical tasks and realistic timelines.
- Implemented SEO best practices: semantic HTML, schema markup, and configuration of Yoast/Rank Math.
- Applied WordPress security best practices: sanitization, escaping, nonces, and limiting admin exposure.

🏢 ***Dynamo Web solution*** – Islamabad, Pakistan

Junior PHP Developer

[02/05/2022 – 30/12/2022]

- **Web Application Development:** Developed responsive web applications using PHP and the Laravel framework following standard MVC architecture.
- **Database Management:** Designed MySQL database schemas, managed data models using Eloquent ORM, and wrote database migrations.
- **User Authentication:** Implemented secure user login, registration, and role-based access control systems using Laravel packages.
- **Data Validation:** Created custom request validation to sanitize incoming user data, prevent security vulnerabilities, and handle file uploads.

SKILLS

PHP / Laravel / WordPress / API integration / JavaScript / React Js / JQuery / MySQL / HTML / Version Control (Git) / CSS / Bootstrape / TailWind Css

PROJECTS

Moon Motorsports Developed a responsive **WordPress** dealer website using **Elementor Pro**, integrating **inventory APIs** and custom fields to dynamically sync, display, and update vehicle listings in real time.
